

Muhammad Adam

Agentic AI Full Stack Developer

Islamabad, Pakistan · chaudhrayadam@gmail.com · +92 303 8705165 · github.com/AdamChoudary

SUMMARY

Full-stack engineer with 2+ years shipping production web platforms and agentic AI systems: Next.js and TypeScript front ends, Python/FastAPI services, LLM orchestration with the OpenAI Agents SDK and LangGraph, real-time voice agents on LiveKit and Vapi, and the Docker, Redis and Nginx infrastructure behind them.

EXPERIENCE

Agentic AI Full Stack Developer — The Visa Consultancy May 2026 – Present

- Build LLM agents for client intake, eligibility pre-screening and follow-ups, with human review on each decision.
- Own delivery end to end: Next.js interfaces, Python/FastAPI services and the tools the agents call.
- Add guardrails, structured outputs and evaluations so AI-generated guidance stays accurate and traceable.

Full Stack Engineer — Aptive Mind Nov 2025 – Apr 2026

- Architected large-scale location-data orchestration that keeps business listings consistent across platforms.
- Built full-stack features with Next.js, TypeScript and Python/FastAPI, shipped as Docker containers.
- Integrated LLM-powered automation into existing business workflows without disrupting operations.

Full Stack Engineer — Auroxa Tech Jul – Nov 2025

- Built real-time voice agents on Vapi, LiveKit and the OpenAI Realtime API, integrated with CRMs and calendars.
- Engineered bulk data-sync pipelines with reconciliation checks to keep large datasets consistent across APIs.
- Owned deployment: Dockerised services behind Nginx with load balancing, reverse proxying and Redis caching.

Frontend Developer — Dot Escapist Aug 2024 – Jun 2025

- Delivered features end to end across Django REST endpoints, PostgreSQL models and Next.js screens.
- Implemented secure server actions and API routes with shared types between back end and UI.
- Reworked CRUD-heavy UI flows to cut steps and improve responsiveness.

Frontend Developer Intern — Al-Basirr Technologies Jun – Aug 2024

- Integrated REST APIs into responsive Next.js and Tailwind CSS interfaces.
- Debugged API errors, verification issues and data conflicts during large integrations.

SELECTED PROJECTS

GoCreation — AI legal assistant for company formation in Morocco gocreation.ma

Next.js, LangGraph, FastAPI, OpenAI, Pinecone

OUIIMI — Service-booking marketplace with a fair revenue model ouiimi.com

Next.js, React, MongoDB, Stripe, Tailwind CSS

Jordan — Real-time voice agent for inbound customer support

LiveKit, OpenAI, FastAPI, Python

SKILLS

AI & agents	OpenAI Agents SDK, LangGraph, LangChain, CrewAI, MCP, LiveKit, Vapi, Pinecone
Backend	Python, FastAPI, Django, Node.js, PostgreSQL, MongoDB, Redis
Frontend	TypeScript, Next.js, React, Tailwind CSS
Infrastructure	Docker, Nginx, Dapr, GitHub Actions, Vercel, Fly.io, Git
Languages	English (Professional), Urdu (Native)

EDUCATION

AI Engineering Diploma — PIAIC, Air University Jun 2023 – Present

Generative AI, agentic systems and cloud-native computing.
